

## Group Project Marking Scheme COMP9417 , T2 2019

Category [Mark]	Section [Mark]	Comments
Report [27]	Introduction [2]	Clear introduction of the problem and report overview
	Dataset [2]	Clear description of dataset
		Clear description of data grouping (if applicable)
	Methods [9]	Clear presentation of methods applied
		Clear presentation of pre-processing and feature extraction (if applicable)
		Appropriate level of method complexity
		Correct logic of method choices and reasonable design choices
		Clear description of evaluation metrics
	Results [9]	Presentation of results using figures and tables
		Result evaluation using appropriate metrics
		Evaluation of various hyper-parameters and design choices
		Description of feature importance criteria
	Discussion [4]	Comparison of performance among different methods
		Discussion of advantages and disadvantages of various methods
		Discussion of findings based on results
	Conclusion [1]	A summary of the problem, method, results and discussion
Code [3]	Code [3]	Well organised and well-commented code

**Note:** Please note that 50% of your mark will be weighted based on your individual contribution. Individual contributions will be assessed through a peer-review process.
